Application No. 10/583,463 Docket No.: W1878.0234 Reply to Office Action of October 28, 2008

## AMENDMENTS TO THE CLAIMS

 (Currently amended) A flame-retardant thermoplastic resin composition comprising at least a plant-derived resin which is a polylactic acid resin (A) and a flame retardant (B), wherein the weight proportions of the individual components in the flameretardant thermoplastic resin composition are:

> 30≦W1<55.5 44.5<X1≤70

wherein W<sub>1</sub> is the percentage by mass of the plant-derived resin (A) and X<sub>1</sub> is the percentage by mass of the flame retardant (B), and 90% by mass or more of the flame retardant (B) is composed of a metal hydrate comprises aluminum hydroxide containing an alkali metal based substance sodium oxide in an amount of 0.18% by mass or less.

2. (Currently amended) A flame-retardant thermoplastic resin composition comprising at least a plant-derived resin which is a polylactic acid resin (A), a flame retardant (B) and an aromatic ring-containing compound (C), wherein the weight proportions of the individual components in the flame-retardant thermoplastic resin composition are:

25≦W₂<55.5

39.5≤X2≤70

0.5≦Y≦20

wherein W2 is the percentage by mass of the plant-derived resin (A), X2 is the percentage by mass of the flame retardant (B), and Y is the percentage by mass of the aromatic ring-containing compound (C), and 90% by mass or more of the flame retardant (B) is composed of a metal-hydrate comprises aluminum hydroxide containing an alkali metal-based substance sodium oxide in an amount of 0.18% by mass or less.

3. (Currently amended) A flame-retardant thermoplastic resin composition comprising at least a plant-derived resin which is a polylactic acid resin (A), a flame retardant (B), an aromatic ring-containing compound (C) and a nucleating agent (D), wherein the weight proportions of the individual components in the flame-retardant thermoplastic resin composition are:

25≦W₃<55.5 29.5≤X₃≦70 0.5≦Y≦20 0.05<Z≤20

wherein Ws is the percentage by mass of the plant-derived resin (A), Xs is the percentage by mass of the flame retardant (B), Y is the percentage by mass of the aromatic ring-containing compound (C), and Z is the percentage by mass of the nucleating agent (D), and 90% by mass or more of the flame retardant (B) is composed of a metal hydrate comprises aluminum hydroxide containing an alkali metal based substance sodium oxide in an amount of 0.18% by mass or less.

- 4. (Previously presented) The flame-retardant thermoplastic resin composition according to Claim 2, wherein the aromatic ring-containing compound (C) is a compound selected from the group consisting of phenols, silicone compounds and boron compounds.
  - 5. (Canceled)
- (Previously presented) The flame-retardant thermoplastic resin composition according to claim 1, further comprising a drip-proof agent (E) in a weight proportion of

1% by mass or less to the total mass of the flame-retardant thermoplastic resin composition.

- 7. (Previously presented) The flame-retardant thermoplastic resin composition according to claim 1, further comprising a high-strength fiber (F) in a weight proportion of 10% by mass or less to the total mass of the flame-retardant thermoplastic resin composition.
- (Previously presented) The flame-retardant thermoplastic resin composition according to Claim 3, wherein the aromatic ring-containing compound (C) is a compound selected from the group consisting of phenols, silicone compounds and boron compounds.

## 9 - 11. (Canceled)

- 12. (Previously presented) The flame-retardant thermoplastic resin composition according to claim 2, further comprising a drip-proof agent (E) in a weight proportion of 1% by mass or less to the total mass of the flame-retardant thermoplastic resin composition.
- 13. (Previously presented) The flame-retardant thermoplastic resin composition according to claim 3, further comprising a drip-proof agent (E) in a weight proportion of 1% by mass or less to the total mass of the flame-retardant thermoplastic resin composition.

Application No. 10/583,463 Docket No.: W1878.0234 Reply to Office Action of October 28, 2008

14. (Previously presented) The flame-retardant thermoplastic resin composition according to claim 4, further comprising a drip-proof agent (E) in a weight proportion of

1% by mass or less to the total mass of the flame-retardant thermoplastic resin

composition.

15. (Canceled)

(Previously presented) The flame-retardant thermoplastic resin composition

according to claim 2, further comprising a high-strength fiber (F) in a weight proportion of

10% by mass or less to the total mass of the flame-retardant thermoplastic resin

composition.

17. (Previously presented) The flame-retardant thermoplastic resin composition

according to claim 3, further comprising a high-strength fiber (F) in a weight proportion of

10% by mass or less to the total mass of the flame-retardant thermoplastic resin

composition.

18. (Previously presented) The flame-retardant thermoplastic resin composition

according to claim 4, further comprising a high-strength fiber (F) in a weight proportion of

10% by mass or less to the total mass of the flame-retardant thermoplastic resin

composition.

(Canceled)

6

20. (Previously presented) The flame-retardant thermoplastic resin composition according to claim 6, further comprising a high-strength fiber (F) in a weight proportion of 10% by mass or less to the total mass of the flame-retardant thermoplastic resin composition.
